

# Adding Value to your Work Horses

## ANNUAL MAINTENANCE CONTRACT (AMC)

- Protect your Costly Investments
- Ensure least downtime
- Leverage on better productivity and constant precision
- Ensured machine accuracy

*Just contract us to protect your machine  
After all we have designed and developed it.*

**ASKAR GROUP**

## Why do you need to enter into an AMC?

Simple. Everything on the Globe is stressed. They need check up including machines. Machines can stop working without a warning. Their health needs to be monitored constantly to ensure continuous uninterrupted production. Especially when they are performing non-stop over 3 shifts or otherwise.

When they stop performing, imagine the chaos they will cause. All production schedules will go awry. Delivery schedules will take a beating. And you will have a crisis on your hand, leading you into unwanted stress.

Do you really need to go through this agony and strain? Just spare some time and talk to us. We will help you to minimize downtime. Ensure your schedules are unaffected. More important we will protect your machines and help you reap good returns on your precious investment.

Enter into an AMC with us and just relax. As the famous proverb says: **"PREVENTION IS BETTER THAN CURE"**.

## What does an AMC do?

- Takes over the management of your asset (machine).
- Helps reduce your investment and dependability on technical staff
- Carries out periodical health check up of your machine
- Maintains the performance chart and list of problems if any for reference
- Ensures that our trained service engineers are on call 24 hours
- ASKAR maintains readily available inventory of spares and critical parts at strategic Service points to ensure faster restoration of machine

## Testimonial

This is what an esteemed customer of ours had to say about AMC. He is the proud owner of our machine Spinner 15 – machine No. 9659 – for the past 5 years. He has taken an AMC every year without fail.

"We are glad we have an ASKAR machine with us. On request from ASKAR, I checked my records and found that I have had literally no breakdowns on the machine for the last 5 years. It is amazing. My advice is: Take an AMC and free yourself of tensions."

## Scope of AMC

- Planned check up of machines every two months
- Easy management of the machine at affordable cost
- Quick response time
- Timely prevention and planning necessary repair or replacement with genuine spares
- Training of customer's operators at regular intervals
- Identification of wear and tear parts well in advance
- Planning replacement of spares depending on the usage of the machine and updating of operation
